

Collection

If you are given a collection of objects, you can count them correctly.

For example, you could see a pile of blocks and count them one-by-one to see that there are 26 blocks in total.

Up by 2's

Starting at a whole number less than 100, you can count up by 2's.

35, 37, 39, 41, 43, 45, ...

For example, you could start at 35 and count up by 2's to 37, 39, 41, 43, 45 and so on.

Down by 2's

Starting at a whole number less than 100, you can count down by 2's.

46, 44, 42, 40, 38, 36, ...

For example, you could start at 46 and count down by 2's to 44, 42, 40, 38, 36 and so on.

Down by 1's

Starting at a whole number less than 100, you can count down by 1's.

53, 52, 51, 50, 49, 48, ...

For example, you could start at 53 and count down by 1's to 52, 51, 50, 49, 48 and so on.

Up by 1's

Starting at a whole number less than 100, you can count up by 1's.

28, 29, 30, 31, 32, 33, ...

For example, you could start at 28 and count up by 1's to 29, 30, 31, 32, 33 and so on.
